

Product Improvement: R2632P O-ring and washer (BMW applications)

R2632P now supplied with O-ring and washer

Suits: ALFA ROMEO 159 JTD; AUDI A4, A5, A6, A8, Q5 & Q7

Additional listings: BMW 120d E87, 320d E90 & 520d E60

Product Development has identified that the same R2632P element used for AUDI applications is being used in certain BMW diesel vehicles with the only difference being the type of O-ring used.

To cover those vehicles the simplest solution was to include the extra O-ring and washer. All current stock has an instruction sheet inside that will indicate on what applications to use each O-ring. The washer is simply the sump plug washer making no effect on the filter fitment.
