The cabin filter is located right behind the glove box. To access it please follow the following instructions.

1. Open the glove box. Press on both sides of the lid as shown above and then unhinge the strut located on the left hand side when looking at it as on the next picture.

2. Pull strut gently in the direction shown in picture and the glove box lid will drop.

3. Once the glove box lid is dropped the cabin air filter housing will be clearly visible.

4. Remove the lid housing and replace old cabin filter and refit components in reverse order.
