1. Unmount the clipped-in cover on the left side of the instrument panel.

2. Open the glove box and remove the screws as indicated (5 x screws in total).

3. Disconnect the power cord for glove box light and remove the glove box.

4. The filter housing is located behind the glove box door. Unclip the filter cover clips (one on each side).

5. Ensure the air flow arrow points down.

Remove the old filter and replace with RYCO filter. Re-fit all parts in reverse direction.
