

RYCO FILTERS

FITTING INSTRUCTIONS FOR RYCO CABIN FILTER RCA266C.

MERCEDES SLK (R171 & R172)

(Filter is located underneath glove box / footwell)

1. The cabin air filter is located in the passenger footwell area above the trim cover sitting below the glove box where the power outlet is
2. To remove the cover: Remove the three screws holding it in place with a T20 screwdriver. Pull the footrest carpet towards you so the trim can be pulled out. Pull the trim out gently until the internal connector for the light and power outlet is visible and disconnect them. Remove the cover.
3. At this point the housing will be visible sitting next to the HVAC blower. Slide clip to unlock the housing lid and gently pull and slide out. Gently pull the filter out taking care not to make a mess with any of the dirt trapped in it.
4. Clean the housing from loose dirt & dust and fit new filter, ensuring it is in the correct air flow direction (see side of filter for indicator) and refit all components in reverse order.
