

RYCO FILTERS

FITTING INSTRUCTIONS FOR RYCO CABIN FILTER RCA273C.

VOLVO C30, S40 & V50

1. The cabin air filter is located behind the centre console lower trim in the passenger side. Note: Radio code may be needed.
2. For better working space, slide the passenger seat all the way back. Unclip the lower trim panel of the centre console. The cabin air filter housing is located at the far end towards the firewall.
3. The main wiring harness tray may need to be removed to access the filter housing easily. There are two lock knobs at the front of the tray, twist them to drop the tray then unhinge it from the rear pivot points. Disconnect main connectors and move aside.
4. Remove the metal bracket (where the tray pivots at the back) by Undoing the two (2) bolts.
5. The cabin air filter housing is now accessible. Remove the three (3) bolts securing the lid and remove it. Slide out the old filter carefully to avoid any accumulated debris from being spread around and clean the area. Slide the new filter in making sure it faces to the correct air flow direction and refit all components in reverse order.
