

# RYCO FILTERS

## FITTING INSTRUCTIONS FOR RYCO CABIN FILTER RCA299MS MERCEDES BENZ C CLASS (W204) & E CLASS (W212)

1. The cabin air filter is located below the glove box compartment in the passenger footwell area.
2. For better working space, slide the passenger seat all the way back. Remove the three (3) screws securing the plastic trim cover right below the glove box and pull aside then pull back the carpet that is against the firewall so it gives a better access to the cabin filter housing.
3. Identify the small metal clip to the side of the housing holding the lid against the housing then slide to the side the sliding plastic bit on the lid that acts as a lock and remove the lid.
4. Slide out the old filter carefully to avoid any accumulated debris from being spread around and clean the area. Slide the new filter in making sure it faces to the correct air flow direction and refit all components in reverse order.
