

Z699 and Z1000 Comparison

We often hear that filters are selected by customers because they look similar to another filter. However, with filters, just because they look the same doesn't mean they are the same!

An example is the visual comparison between Z699 and the newly released Z1000. The Z1000 filter has a different base plate configuration to the Z699, allowing for the different in and out flow directions. We recommend that you always check latest online Ryco catalogue for the correct filter listings.

Z699 is suitable for use on a large number of diesel vehicles.

Major applications include: FORD Ranger PJ& PK; MAZDA BT-50, CX7, MAZDA6 (T/D); MITSUBISHI Pajero; TOYOTA Landcruiser Prado; SUBARU Forester, Outback.

Z1000 suitable for use these applications only:

MAKE	MODEL	SERIES	ENGINE	CYL	LITRES	ENGINE MODEL	FROM	TO
NISSAN	NAVARA	D40	Turbo Diesel	4	2.5	YD25D Dti	06/2006	03/2015
NISSAN	NAVARA	D22	Turbo Diesel	4	2.5	YD25	02/2008	../on
