

Ryco Z872 Oil Filter

**Now Interchangeable with
Fleetguard LF14000NN**

In recent months Cummins Filtration have phased out LF9080 and have replaced this lube filter with LF14000NN. Cummins advise LF14000NN (Cummins 4367100) is now standard on all new Cummins ISX engines and is a recommended upgrade performance filter.

Following extensive testing* in the GUD Automotive Engineering Test Centre, we are pleased to advise Ryco Z872 can be used in place of both Fleetguard LF9080 and LF14000NN.

Ryco's design philosophy is to meet or exceed the equivalent genuine filter performance in the critical areas of Efficiency (percentage of dirt a filter removes), Life (how long a filter lasts before clogging) and Flow (how easily oil flows through the filter).

Previous Engineering testing* has also shown Ryco Z872 can also be used in place of Fleetguard LF9070.**

*Testing in accordance with ISO4548-12:2000

**Please note, height of Z872 is 300mm, compared to approximately 352mm for LF9070
